Meraki Systems Manager

Systems Manager, Cisco's Enterprise Mobility Management solution, allows administrators to securely manage mobile phones, tablets, laptops and desktops. Devices, applications, and users are easily and simply managed via the Meraki Cloud Dashboard.

WHAT DOES SYSTEMS MANAGER DO?	WHY IS IT IMPORTANT? WHAT IS THE BENEFIT?
MANAGES DEVICES Smartphones, tablets, laptops, desktops	Simple, single license for all device types and operating systems makes purchasing and deploying easy!
MANAGES APPS Push apps and content, block apps, remove unwanted apps (New! Includes Single App mode!)	10% of all apps are malicious, yet all devices are allowed in the network! Lowers risk which companies love!
IMPROVES SECURITY Enforce passwords, restrict access, track device location	Mobile devices are a leading cause of stolen data (60% of thefts!)
SAVES TIME Automatic device enrollment, dynamic policy management	IT time is costly. Simple device enrollment and easy cloud management saves money!
SPECIAL 'BONUS' FEATURES! New features added at no additional cost!	• Seamless device enrollment using Meraki Sentry • Integration with Cisco Identity Services and Mobility Services (ISE and MSE) • Special Teacher's Assistant app gives teachers secure, limited access to control devices/app access in classrooms • Leading solution for iOS 9 devices

Ultra Simple Pricing

One license includes all features, even 24/7 support, regardless of device type!

What Customers are Saying

"@meraki Systems Manager is possibly the best thing that has happened to networking since the adoption of the TCP/IP suite"
Benjamin Newman @BenjaminNewmanE

"If you are looking for a top of the line MDM or systems manager, then look no further. #Meraki #MDM #SME #cisco"
Chris @TechGuru830
